

Hand(s) on

You go you go,
where ever you may go
You hold the line
Try to keep things in control

You try you try
The best you can you try
To help the ones
For them you see threats eye to eye

You've won you've won
But you're trying to become one
with the violence
That you saw with work you do
You're scared you're scared
But how can you be prepared
For all the violence
And now it's controlling you

You hear you hear
what isn't there to hear
The sounds you make
It helps you getting your thoughts clear

You find you find,
what ever there's to find
The future holds
Nothing that helps to remind

And now you have to be hands on
with only one good hand
